

Gold Coast University Hospital

Project Case Study

Project name: Gold Coast University Hospital

Location: Gold Coast, QLD

Sector: Health

Value: \$97 million

Duration: 60 months

Completed date: March 2013

LCEQ is proud to have completed the electrical fit-out for the Gold Coast University Hospital (GCUH), alongside LendLease, a new \$1.76 billion hospital to replace the old Gold Coast Hospital.

GCUH opened in 2013 and has since been recognised as one of the top 10 hospital facilities in the world, with more than 900 beds across seven state-of-the-art buildings spanning 170,000sqm.

The facility offers a world-class hospital experience, with high-level surgery, trauma, general medicine, maternity and neonatal care, while also offering leading teaching and research facilities for the next generation of health professionals.

Complete electrical fit-out for GCUH included temporary electrical installation during construction and low voltage installation of main switchboards, reticulation, distribution boards, UPS for critical load and specialty lighting for the operating theatres and helipad.

We also installed DALI lighting control and an emergency lighting monitoring system.

The cardiac and body protected areas were installed, tested and certified by LCEQ, before handing over to the medical teams upon completion.

The \$97 million contract was completed across 180 weeks, showcasing our intimate understanding of hospital electrical requirements and systems.

We are a trusted leader within the vital health sector, with a long list of hospital success stories to our name including Sunshine Coast Hospital, Mater Adults Hospital, Queensland Children's Hospital, Ipswich Hospital, St Andrew's Hospital and more.
